Kordia Solutions Upgrades to new ISIS Java 4.2

The newly released ISIS Enterprise Java 4.2 has been implemented successfully at the Homebush Australia site for Kordia Projects Division. Interfaced to the In-house Legacy system ISIS Java 4.2 has now also been installed at the Kordia Maintenance and Service Division and is in the process of being implemented into the Interstate Warehousing facilities in Melbourne, Perth and Brisbane. All operations are functioning from a centrally based Server located in Sydney NSW.

Kordia are a New Zealand government-owned broadcast and telecommunications company, operating in Australia and New Zealand. They provide national communications services for broadcast and telecommunications customers in New Zealand, as well as specialized network solutions. New Zealand customers include: Vodafone, 2degrees, Sky Television, TVNZ, Mediaworks, Radio New Zealand, Telecom New Zealand, Freeview, and The Radio Network. In Australia, Kordia provides contracting and consulting services for major telecommunications players, including Telstra, Optus, Vodafone and Hutchison.

Kordia Solutions employees over 750 engineers, operations, and maintenance experts throughout Australia and New Zealand.

Kordia Solutions Australia Logistics and Warehousing ensures that its customer's communications networks are always on and alive.
